RESEARCH AND
PROFESSIONAL
EXPERIENCE**Post-Doctoral Researcher**

Ecology, Evolution and Marine Biology
University of California Santa Barbara

2008 to 2012
Santa Barbara

- Pacific salmon, full life cycle model, bioenergetic model, instream-flow assessments.
- Impact of metabolism on isotope dynamics in soft and calcified tissues
- Reconstruction of life histories
- Parameter estimation of DEB parameters using Bayesian inferences.

Post-Doctoral Researcher

European Institute for Marine Studies
Université de Bretagne Occidentale

2008
Brest, France

I studied the impact of metabolism on isotope ratios ($\delta^{13}\text{C}$) in bivalve shells and fish otoliths. Case studies: scallop (*Pecten maximus*) in the Bay of Brest (France) and whitefish (*Coregonus lavaretus*) in Annecy lake, France.

Doctoral Research

Ecology and Models for Fisheries Sciences
Ifremer

2003-2007
Nantes, France

My dissertation research focused on the impact of the environment on the spawning windows of small pelagic fish species. These spawning windows in turn impact larvae dispersal, growth and survival which are critical to understand the large fluctuations in abundance of these small pelagic fish populations. I explored in particular how a bioenergetic model of the life cycle of the Bay of Biscay anchovy (*Engraulis encrasicolus*) forced by environmental conditions simulated from a 3D biogeochemical-hydrodynamic model of the Bay of Biscay could predict inter-annual variations in anchovy spawning locations and timing.

Research Internship (M.S.)

French research Institute for Development

7 months, 2002
Cape Town, South Africa

I analyzed fishery- and survey-data to map the distribution of key fish species in the Southern Benguela ecosystem to better understand their spatial and temporal interactions. The database we created was used to parameterize a multispecies individual-based model developed by Y. Shin (French Research Institute for Development) to explore fish community dynamics through size-dependent trophic interactions.

Research Internship (B.S)

Pacific Coast Federation of Fishermen's Associations (PCFFA)

4 months, 2001
San Francisco

I studied the Chinook salmon fishery in California with Pietro Parravano, the past president of the Pacific Coast Federation of Fishermen's Associations. Pietro Parravano was also a Commissioner on the Pew Oceans Commission and I had the chance to participate with him to the Alaska and Maine meetings in 2001 where the different stakeholders of these US coastal states presented their recommendations for the management of US coastal zones.

Research Internship (B.S)

National Federation of Small Scale Fishermen

4 months, 2000
Argentina

I studied two small-scale Argentinian fisheries in Mar del Plata and Puerto Madryn. I was in particular in contact with biologists from the Centro Nacional Patagonico that study the impact of a new fishery on the spiny dogfish (*Squalus acanthias*) population of the Valdes Peninsula.

TEACHING
EXPERIENCE

France

Comprendre l'impact du métabolisme sur les propriétés structurelles et chimiques des biocarbonates (otolithes et coquilles): Apports de l'approche bioénergétique Dynamic Energy Budget (DEB). 1h (2013 and 2014). M2 Sciences de la Mer et du Littoral - IUEM- UE Sclérochronologie.

Guest lecturer (Agrocampus Ouest, France) The Dynamic Energy Budget (DEB) theory, Principles and applications - (graduate, 2h, 2008). Master Environmental studies and agriculture sciences

Guest lecturer, Teaching assistant (French Research Institute for the Exploitation of the Sea, France) Introduction to the DEB theory. Applications to fish and bivalves - (graduate, 18h, 2007)

Mexique

2015 50h, CIBNOR, La Paz (in Spanish) Introducció general a la bioenergética, a la teoria DEB (Dynamic Energy Budget) y a las herramientas básicas de modelización en biología

2014 15h, CIBNOR, La Paz (in Spanish) Introducció general a la bioenergética y a la teoria DEB (Dynamic Energy Budget) con aplicaciones en ecología marina, acuicultura y ciencias de pesquerías

Peru

2014 15h, IMARPE, Lima (in Spanish) Introducció general a la bioenergética y a la teoria DEB (Dynamic Energy Budget) con aplicaciones en ecología marina, acuicultura y ciencias de pesquerías

International DEB course - hosted by the Theoretical Biology Department of Vrije Universiteit (Amsterdam)

8th ed. 20h, Winter quarter 2015, CIBNOR, La Paz (in Spanish) + 2 lectures and labs April 2015, MIO, Marseille

7th ed. 20h, Winter quarter 2013, LEMAR, Brest + 2 lectures and labs April 2013, NIOZ, Texel

6th ed. 20h, Winter quarter 2011, UCSB + 2 lectures and labs April 2011, Instituto Superior Technico, Lisbon

5th ed. 20h, Winter quarter 2009, UCSB

UCSB - 2011-2012

EEMB 120 - Ecology - (undergraduate). 12 lectures. Summer quarter 2012.

EEMB 179/279 - Modeling Ecological and Environmental Change - (undergraduate and graduate). 4 lectures, labs and office hours. Winter quarter 2011.

PhD student advisor - Université de Bordeaux - Florence Mounier 2014-2017

Master student advisor - Universidad Peruana Cayetano Heredia - Edgar Meza Figueroa
- 2014-2015

PhD student advisor - UBO - Romain Lopez - 2012-2015

PhD student advisor - Université de Montpellier - Emmanuelle Dortel - short stays in Brest
- 2013

Undergraduate student supervisor (UCSB)

- *Life cycle, sexual determinism and metabolism of European eel (Anguilla anguilla)* - Peter Kuriyama - BIOL CS 109 Advanced Independent Research (5 months, 2009).
- *Life cycle and metabolism of Chinook Salmon (Oncorhynchus tshawytscha)* - Allison Amenta (3 months, 2009)

Master student supervisor (French Research Institute for the Exploitation of the Sea, France)

Characterization of the diet of the Bay of Biscay anchovy. Benoît Lebreton. Université de La Rochelle, France (3 months, 2004)

PROFESSIONAL
ACTIVITIES

Reviewer for: Aquaculture; Biological Reviews; Journal of Sea Research; Environmental Pollution; Aquatic Living Resources

Society Memberships: Association Française d'Halieumétrie.
